Preparation of mouth for R.P.D

Mouth preparation includes 3 categories:

- 1- Oral surgical preparation
- 2- periodontal preparation
- 3- preparation of abutment teeth

Oral surgical Preparation

- 1- Extraction
- 2- Removal of residual roots
- 3- Impacted Teeth
- 4- Malposed teeth
- 5- Cysts And Odontogenic Tumors
- 6- Exostosis And Tori
- 7- Hyperplastic Tissue
- 8- Muscle Attachment and Freni
- 9- Bony Spines And Knife_Edge Ridges
- 10- Polyps, Papillomas, And Traumatic Hemangiomas
- 11- Hyperkeratosis, Erythroplasia, And Ulcerations
- 12- Dentofacial Deformity
- 13- Osseointegrated Devices
- 14- Augmentation Of Alveolar Bone

Periapical Lesion (Periapical Cyst)

Periapical abscess

Chronic Hyperplastic Pulpitis (Pulp Polyp)

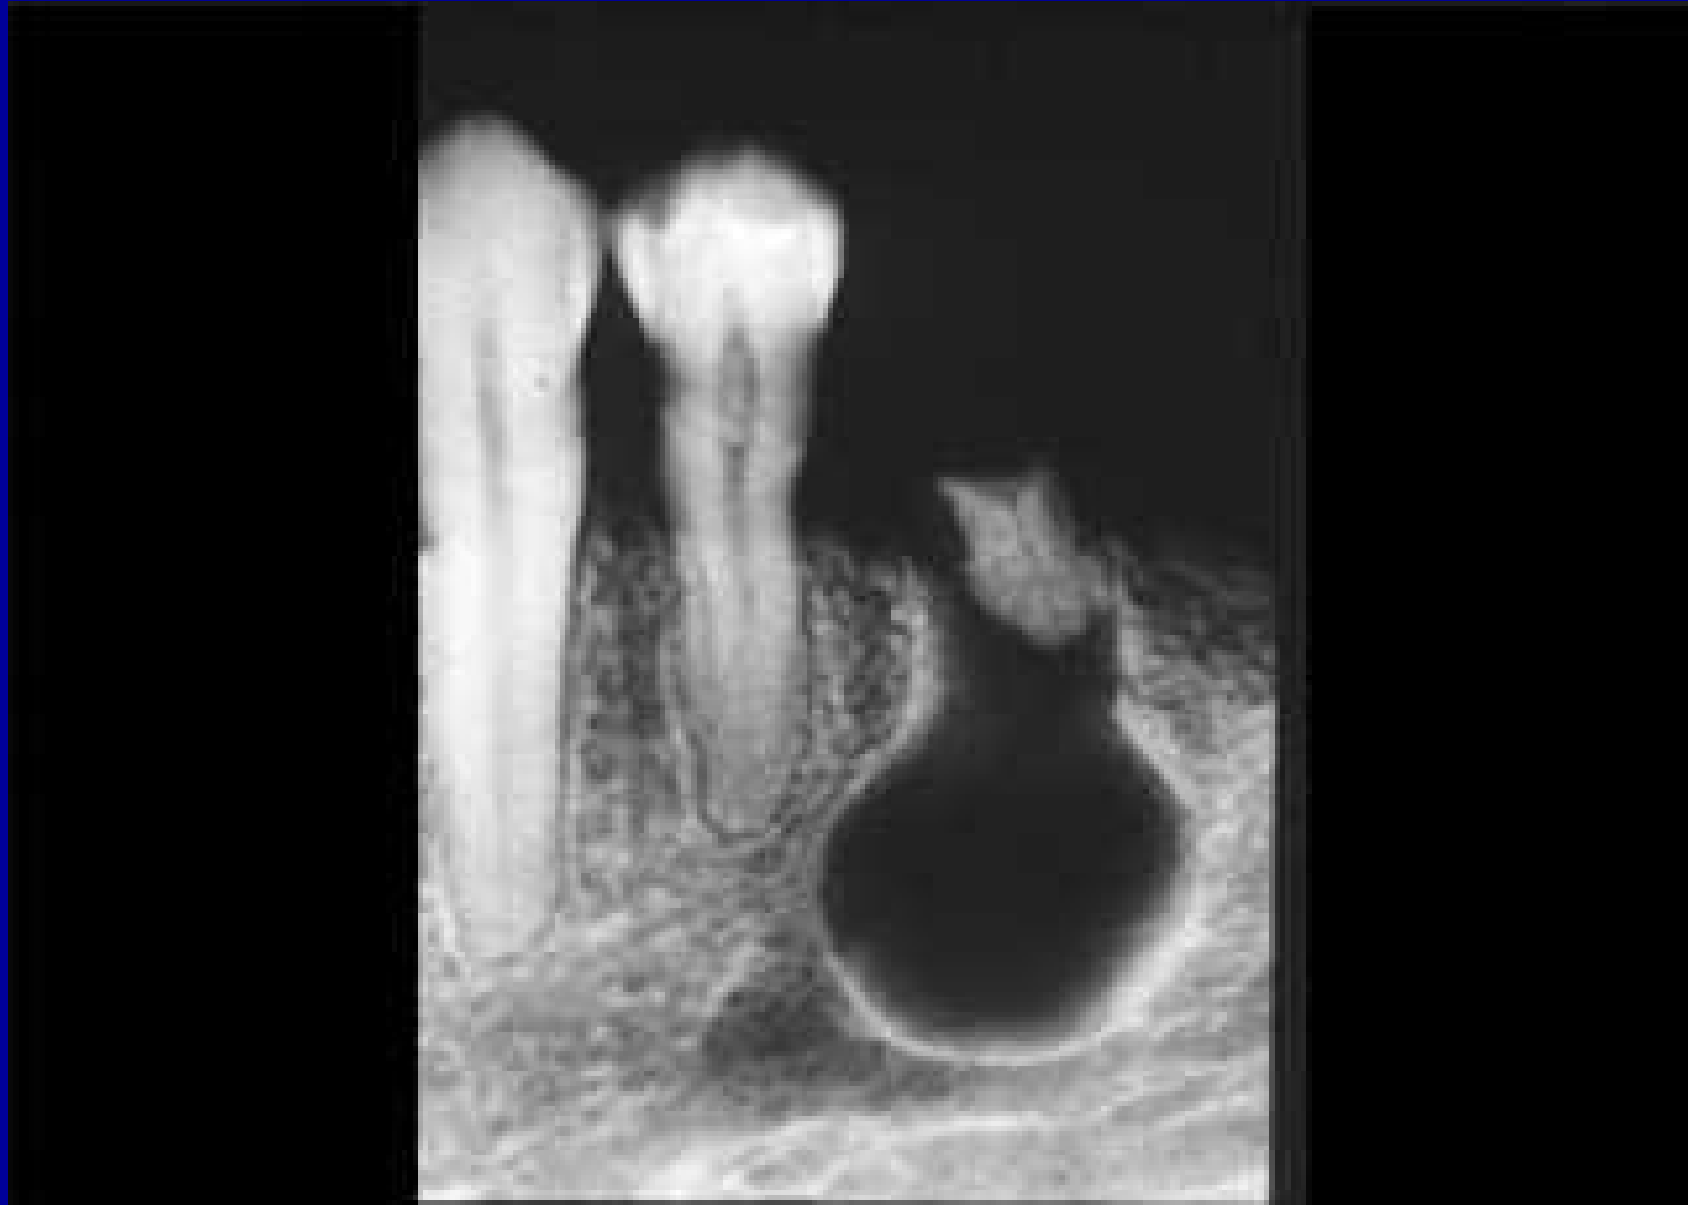

Pulp Disease

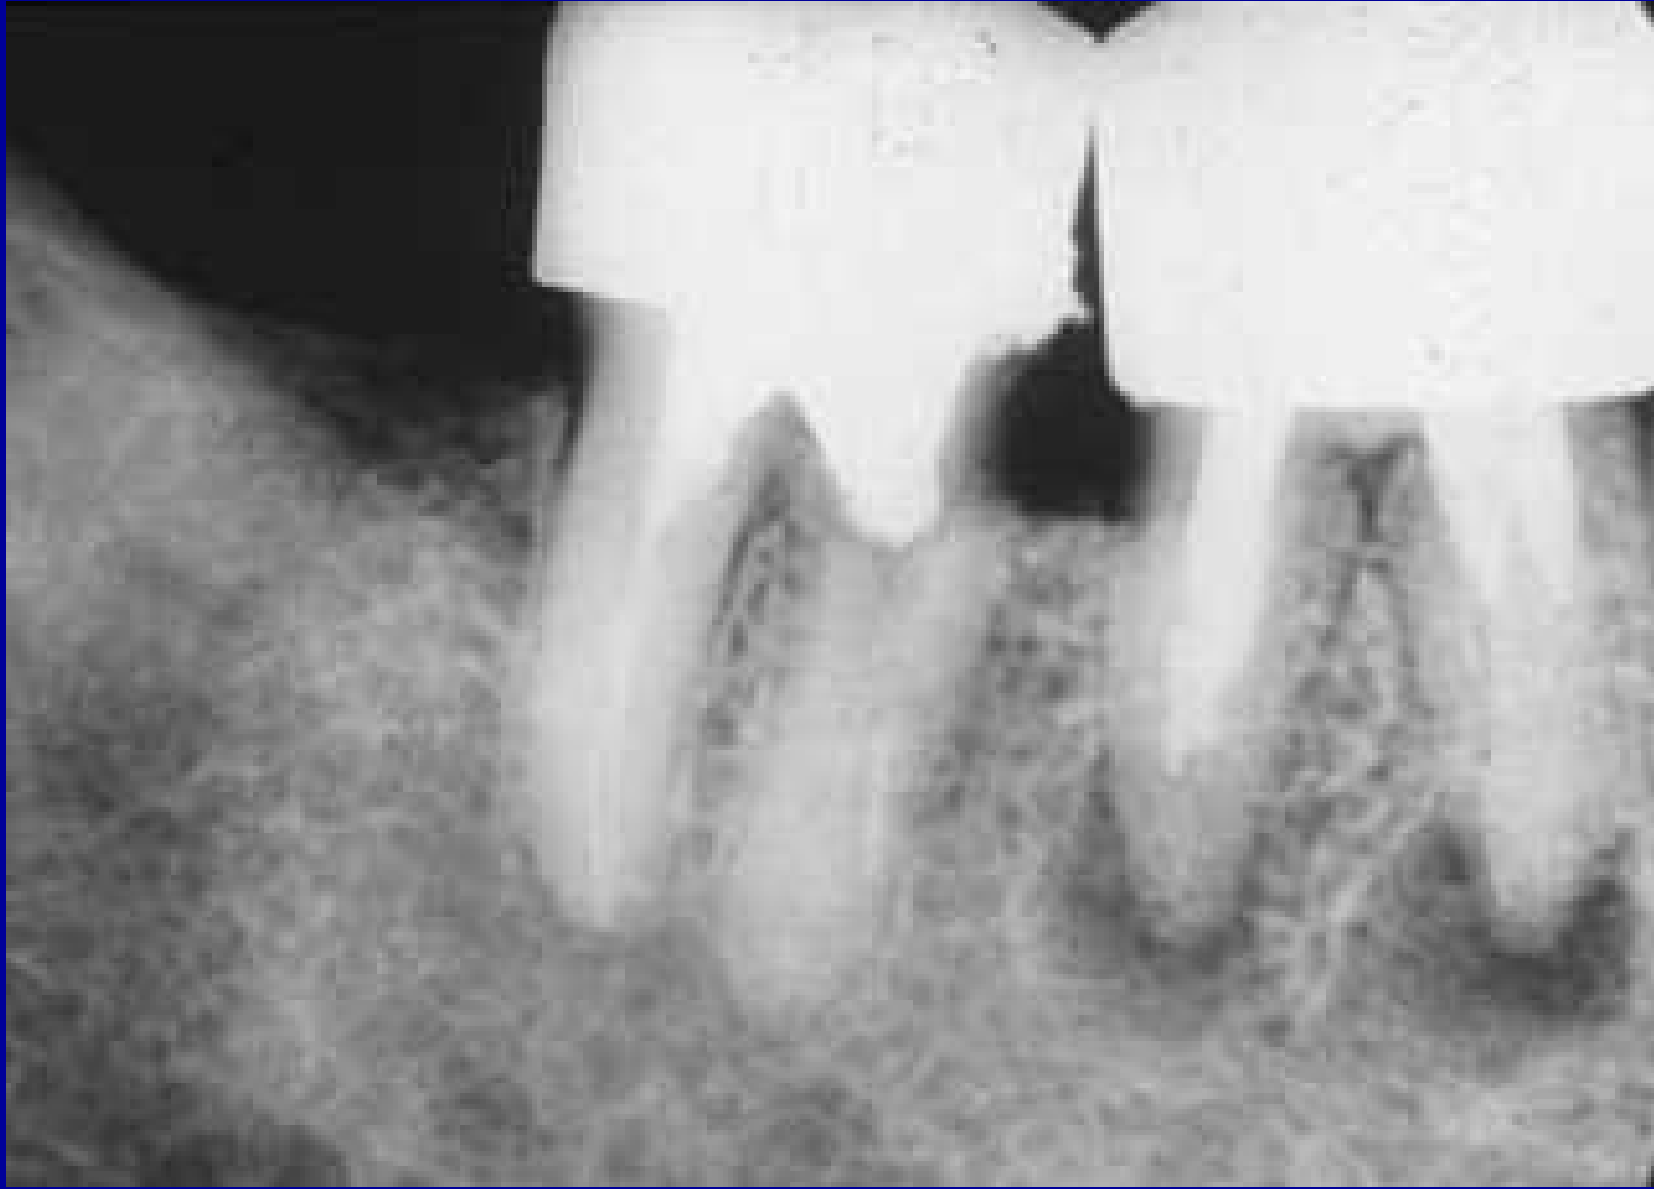

Rampant Caries

Dental Caries (Rampant Caries)

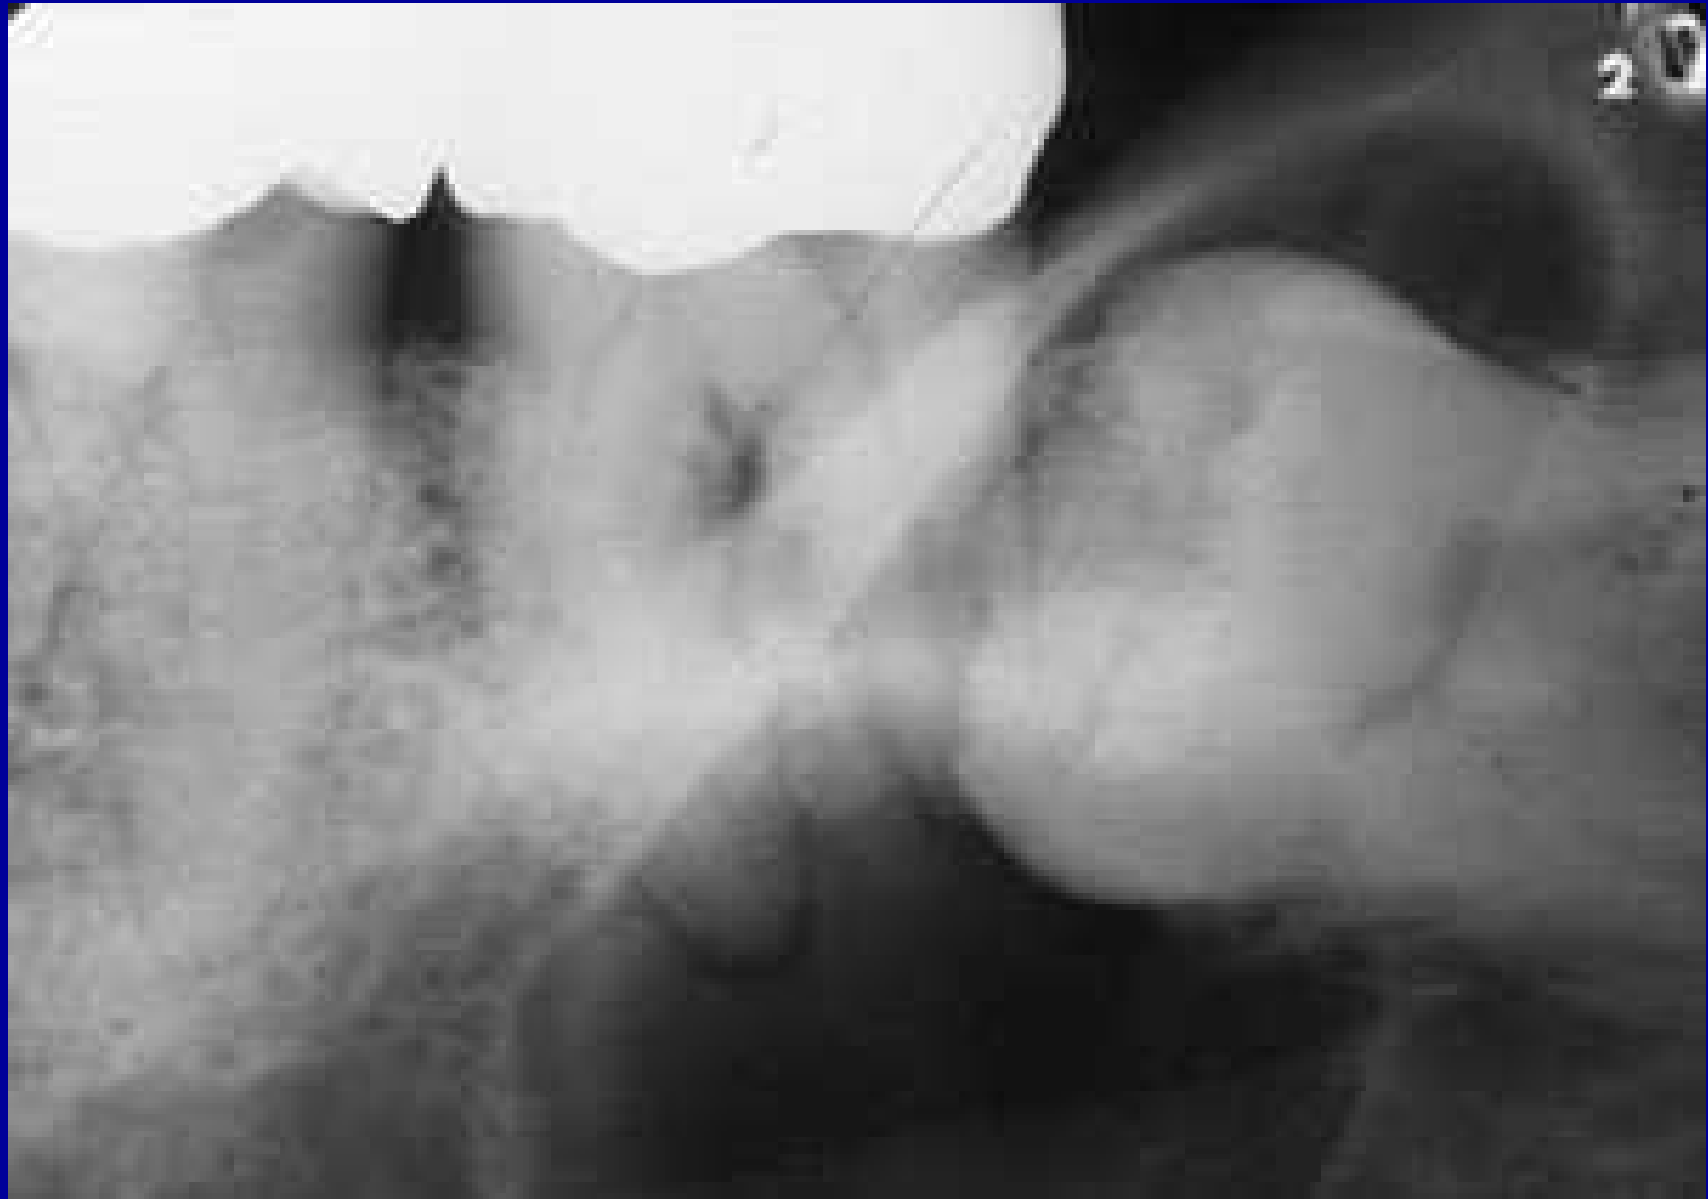

Residual root Associated with Periapical Cyst

Periapical Lesion (Periapical Granuloma)

Impacted Wisdom teeth

Impacted Lower Third Molar

Periapical Lesion (Periapical Cyst)

Dentigerous Cyst

Jaw Lesion in The Posterior Mandible

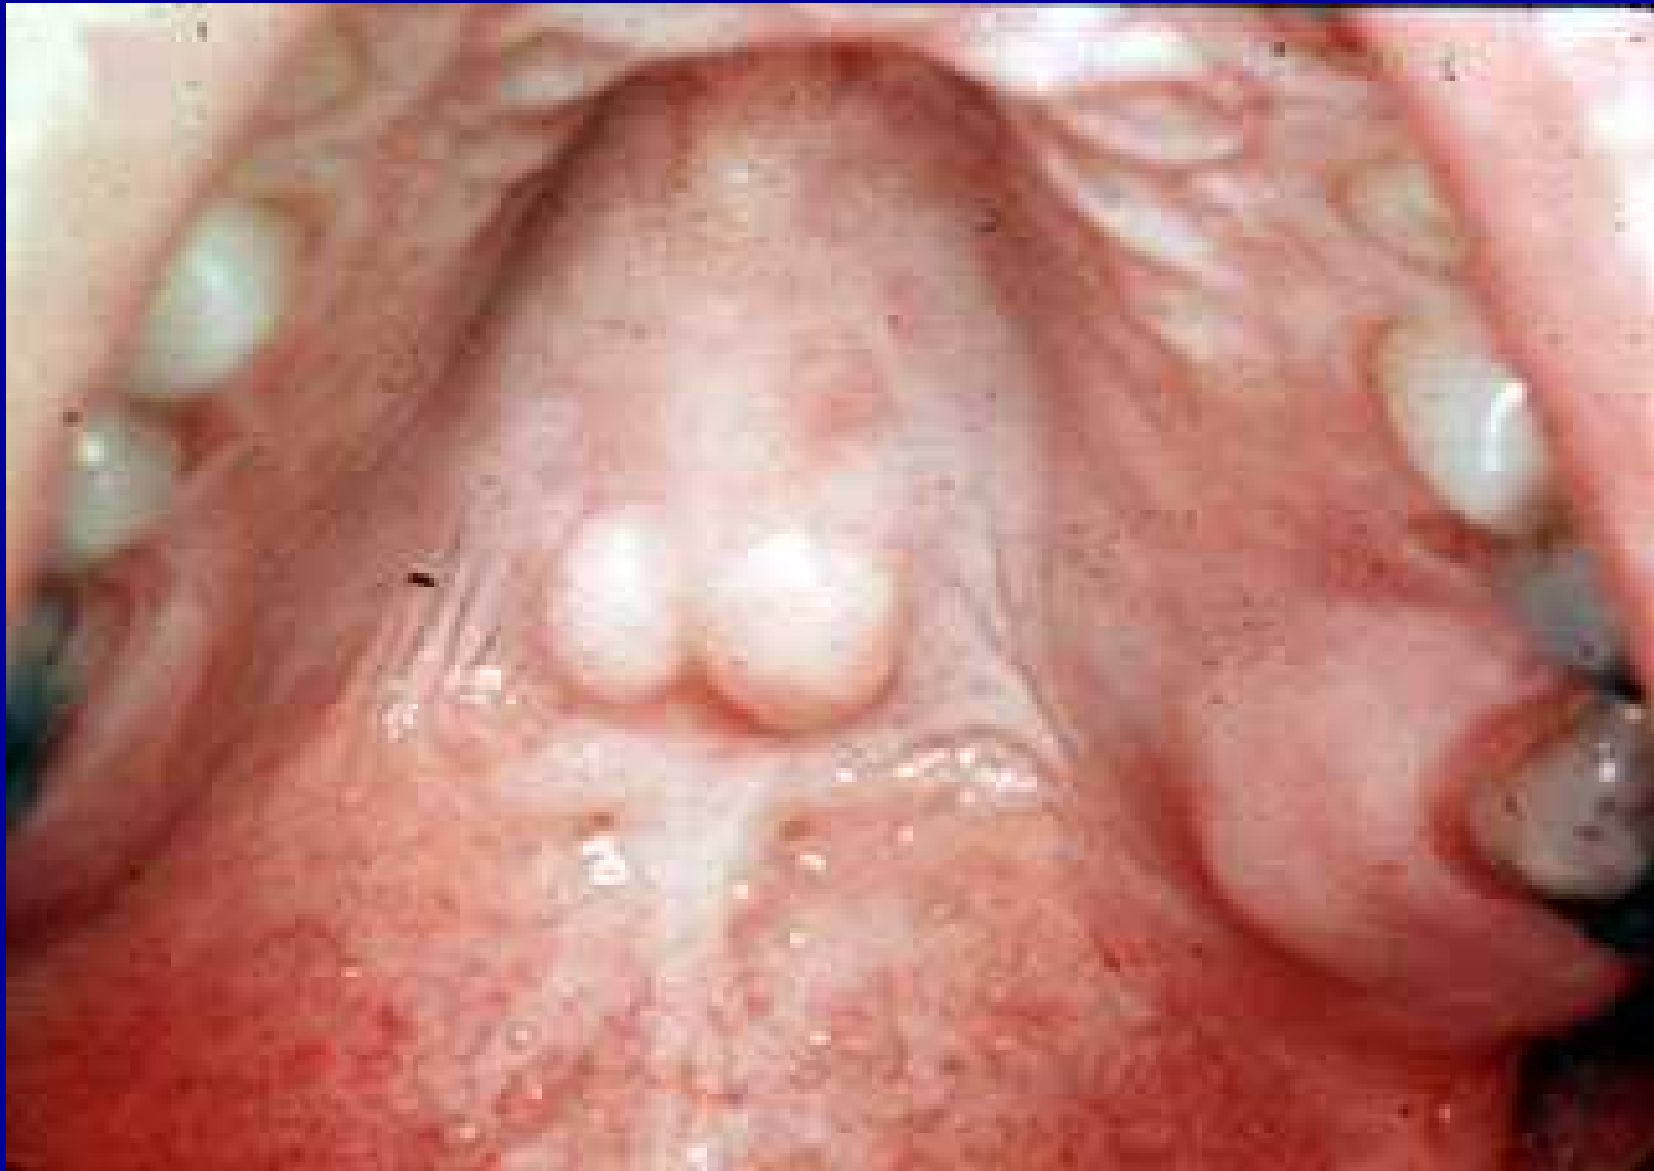

Gingival Cyst

Malignant Tumor

Malignant Tumor

Maxillary Tori (Torus Palatinus)

Bony Exostosis

Prominent Genial Tubercles

Mandibular Resorption

Early Mandibular Resorption

Mucous Membrane Lesion On The Buccal Mucosa

White Lesion (Hyperkeratinization in Masticatory Mucosa)

Hyperkeratosis (White Lesion On The soft palate)

White Lesion (Keratin On The Lateral Border Of Tongue)

Red Lesion (Over growth of irritated granulation Tissue)

Aphthous Ulcer

Acute Inflammatory Lesion

Surgical Procedure At Time Of Implant Insertion

Single Tooth Implant In Place

Radiograph of Superstructure To Be Fully Seated

Ceramic Crown Replacement

Inflammatory Fibrous Hyperplasia Caused by Denture Edge Irritation

Papillary Hyperplasia

Denture Hyperplasia of upper ridge

Denture Hyperplasia of lower ridge

Causative Lower denture in Place

Denture Stomatitis (Upper Arch Under Co/Cr RPD)

Burning From restoration Procedure

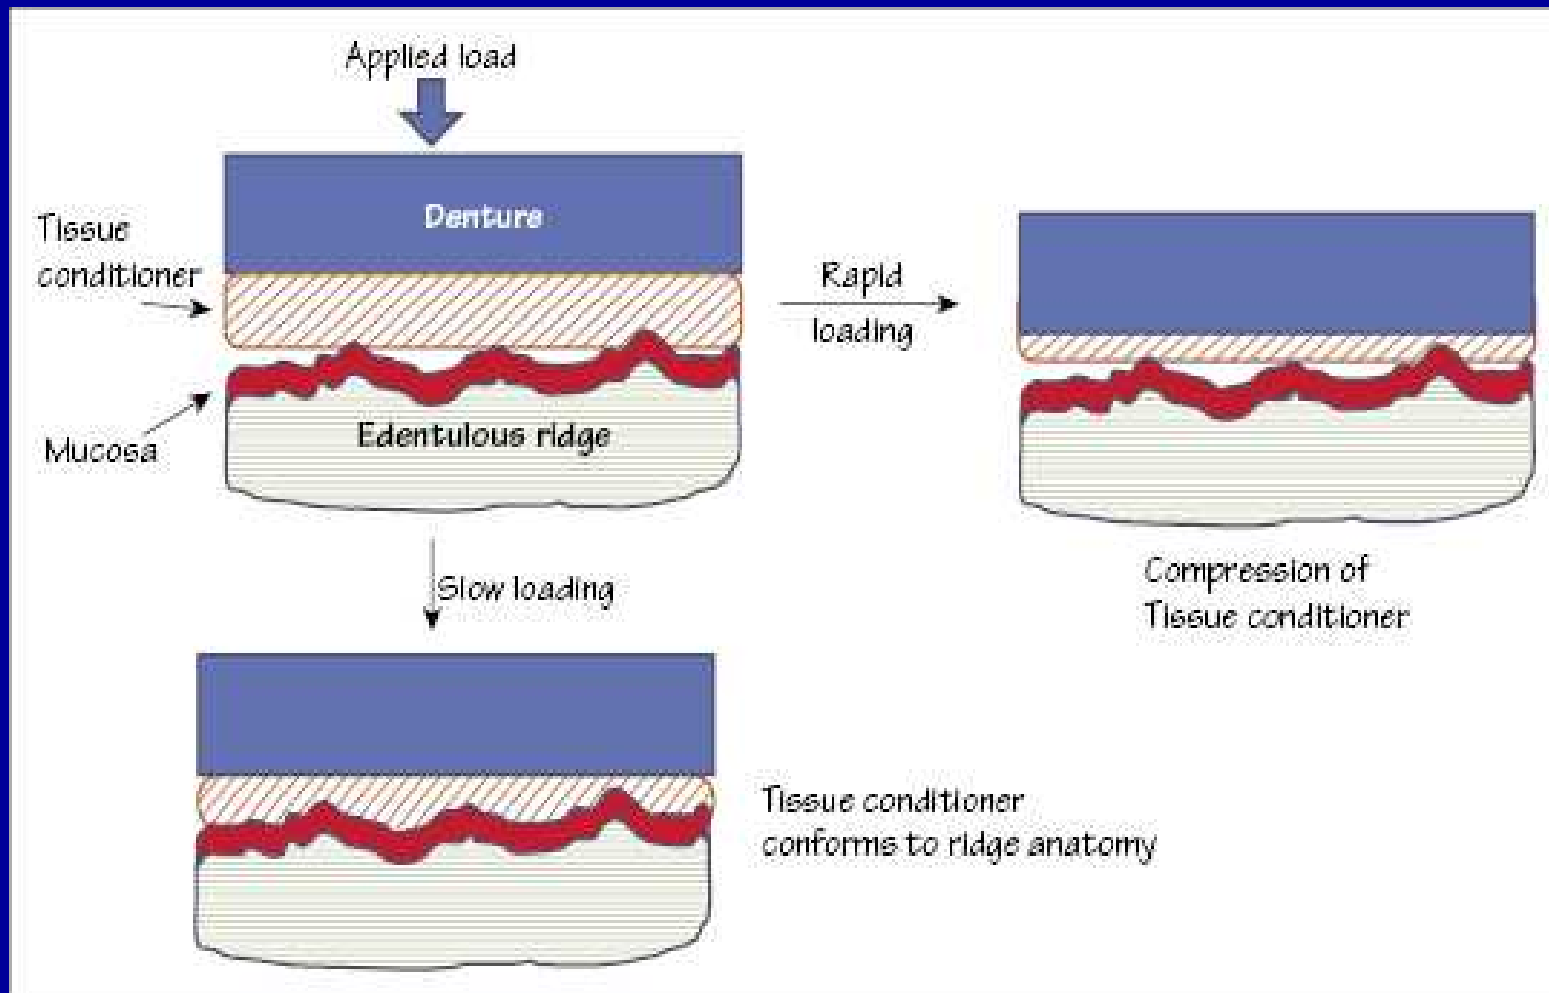

Tissue conditioners

Tissue conditioners

Tissue conditioners

Tissue conditioners
