Let's Start

- G Suite (currently Google Workplace) is a SaaS application. These apps are accessible remotely, over the Internet. Some of the apps included in G Suite are:

Gmail

Ease of use, security and speed of Professional Gmail on your domain name

Drive

Share files effortlessly over the cloud with advanced file management features, granular sharing permission settings and more

Calendar

Schedule meetings, collaborate on video calls and sync them all with your mobile devices seamlessly

Docs

Create, edit, and collaborate with others on documents hosted on the cloud. Enjoy real time editing with all the latest review and text editing features!

Sheets

Build, edit, and review spreadsheets online with all your stakeholders using this robust, feature rich editor. Data manipulation, reporting and sharing is now easy!

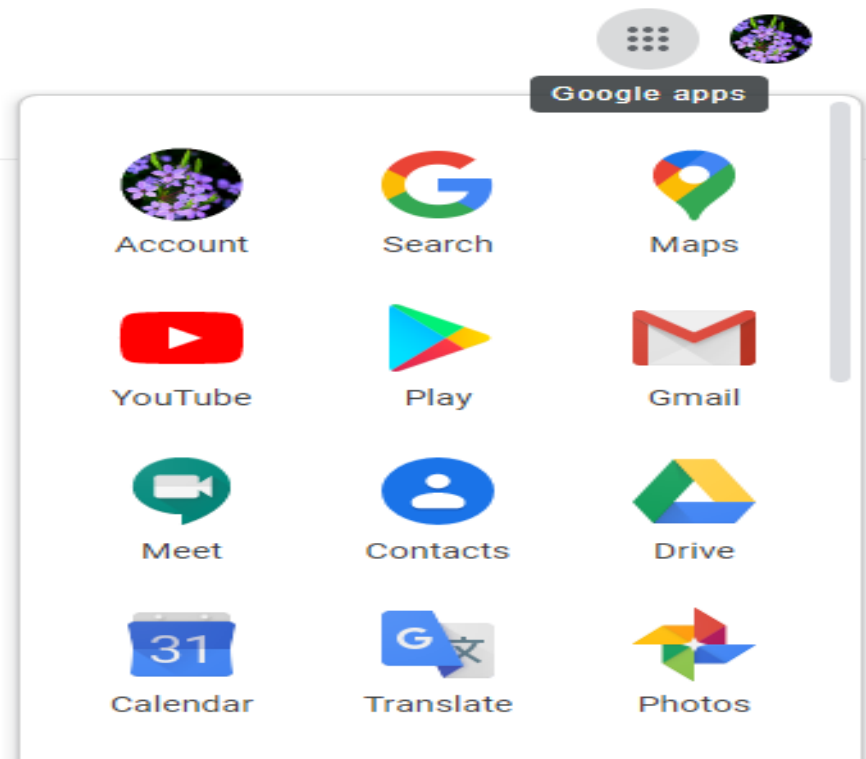

Hangouts

Whether in office or at home, help your team stay together through audio and video meetings

First is First
