THE IMPACT OF COMPUTER ALGORITHMS IN DENTAL OCCLUSION, PRESENT AND FUTURE

The technological innovation provides the opportunity to dental practitioners and patients. The technology can be used in the cases where diagnosis and treatment required time and efforts. The dental treatment (osseotomically or mandibular) entices a fast development in last decades.

This paper presents a literature review for the impact of computer algorithms in dental occlusion- detection and correction. The survey displays the state of the art of the computer technology used in the field of occlusion, and the trends in that field. It showed that the
