Abstract

This study is based upon illustrating the idea of the grammatical factor (Al aa'mell Al- Nahwey) of the most famous grammarian in the seventh century Ibn Malik. It shows the most important key lines which differential the idea of the study, and his grammatical works, resources of the idea and its origins in Ibn Malik's grammar.

The first chapter involves two section. The first one include studying the theory of the factors in Arabian grammar, its emergence and its development, the opinions of the old and modern grammarian, and the types of the factors. The section also deals with studying the moral factor in the grammar and the types of moral factors of Ibn Malik.

The second chapter deals with studying the verbal factors and verb types of Ibn Malik, the condition of the verb as transitive and intransitive, the conditions of omitting working in some verbs and the effect of the grammatical work of the verb in the different works.

The third chapter studies the nominal factor and the types of nominal factors the cause of the name works and how they differ from each others according to certain conditions for its work. It studies the work of the derivatives then the work of the rest working names by making them branch in working on the verbs.

The fourth chapter deals with the positions and the types of the working ones. There work is divided in nouns and verbs, and the difference and the similarity in the position work.

The research in with an conclusion which summarizes the most important results .
