ABSTRACT

The Title of this study is a privatization in the Iraqi Banking activity and it's role in Financing the Development .

This study consist of two aspects theoretical and practical which are related with our subject.

The study is further subdivided into three chapters : the first chapter clears the submit of Iraqi Banking system for a political program and slogan in addition to the effects of the Economic shocks ,in this chapter we also review the Banking laws and we analyze the monetary policy in Iraq .

The second chapter Explain the Banking privatization concept. We also review all the supporting opinions and the disagreed direction and we also review the banking privatization strategy and it's needs, then we took some chosen experiments from other communities like East European countries and the Egyptian experiment.

The third chapter concentrate about banking privatization in Iraq between the real situation present on land and the ambitious future. We also discuss the causes and Aims of return of the private sector to the banking activity after 1991. And in another step we detailed a comparative study between two banks in Iraq ,the first is governmental bank which named AL-Rafiden bank and the other is a private bank which is named Middle East bank.
