## Abstract:

This thesis aims to analyze and study the structural changes in the Arab Countries Economics, and to answer the questions from the view sight that the Arab Integral development can treat these deficits which becomes as a result of these structural changes.

These structural changes are include structural changes of production, gapr, of resources, monetary and financial, budgets, payment balances, and trade balance ,And how the governments manages with these structural changes and the social influences of structural adjustment program which followed as a policies to treat these deficits, Hence, this study supported with Econometric analyses to indicate the values of the structural changes. Therefore, these deficits affected with the structures of Arab Countries Economics, and now the governments' policies aim to control and minimize these structural changes. It's logically in this situation to comprise the following notes:

1. The structural changes are chronic and continuous and causes these deficits, such as Payment balances, and trade balances.
2. The indicators of commercial exchange rate indicate that the Arab Countries economics are greatly influenced by the foreign economy.
3. Oil Returns have vital factor to treat the deficits of Arab Economy Structure and to achieve the Arab Itegral Development.
4. Arab Economic Relations should be away from the political attitudes

Finally this study reached to the following recommendation. In order to Manage the deficits and treat the previous and present deficits in Arab Structural Economics the research recommended that the integral development should be followed.

The final result of analysis of the structural changes in Arab Economics structure emphasises that there is a proportional relation ship between the integral developmant and these deficits which the arab economies suffering from.

The research suggest in this field that Arab countries should increases the Arab exchange trade between them and adjoin to gother the searching that how to treat these deficits in order to serve their selves.
