

Appendices:

Figure (1): Staining methods.

Smear Preparation

Figure (2): smear preparation.

Smear preparation

Figure (3): smear preparation from broth or agar medium.

Figure (4): simple stain

Left: cocci – Right: bacilli

common bacterial arrangement

Shape		Arrangement	
Spherical		diplococcus (pairs)	
	coccus (pl., cocci)	streptococcus (chains)	
		staphylococcus (random or grapelike clusters)	
		micrococcus (square groups of four cells)	
Rod-shaped		streptobacillus (chains)	
	bacillus (pl., bacilli)		
Spiral		sarcina (cubical packets of eight cells)	
	spirillum (pl., spirilla)		
Incomplete spiral			
	vibrio (pl., vibrios)		
Irregular or variable shape			
	pleomorphic		

Figure (5): Bacterial shape & arrangement.

Figure (6): cell wall structure of g-ve and g+ve bacteria.

Figure (7): Gram stain procedure.

Figure (8): Gram negative bacteria under light microscope.

Figure (8): Gram positive bacteria under light microscope.

Figure (9): Gram stain procedure steps.

Figure (10): Acid – Fast Bacteria.

Figure (11): Acid – Fast stain for *Mycobacterium tuberculosis* under light microscope.
