Using Find and Replace

To find text:

In our example, we've written an academic paper and will use the Find command to locate all instances of a particular word.

1. From the **Home** tab, click the **Find** command. You can also press **Ctrl+F** on your keyboard.

- 2. The **navigation pane** will appear on the left side of the screen.
- 3. Type the text you want to find in the field at the top of the navigation pane. In our example, we'll type the word we're looking for.

To replace text:

You may discover that you've made a mistake repeatedly throughout your document, like misspelling someone's name, or that you need to exchange a particular word or phrase for another. You can use Word's **Find and Replace** feature to quickly make revisions. In our example, we'll use Find and Replace to change the title of a magazine so it is abbreviated.

1. From the Home tab, click the Replace command. You can also press Ctrl+H on your keyboard.

- 2. The Find and Replace dialog box will appear.
- 3. Type the text you want to find in the **Find what:** field.
- 4. Type the text you want to replace it with in the **Replace with:** field, then click **Find Next**.

Page margins

A **margin** is the **space** between the text and the edge of your document. By default, a new document's margins are set to **Normal**, which means it has a one-inch space between the text and each edge. Depending on your needs, Word allows you to change your document's margin size.

To format page margins:

Word has a variety of **predefined margin sizes** to choose from.

1. Select the **Layout** tab, then click the **Margins** command.

Custom printing

Sometimes you may find it unnecessary to print your entire document, in which case **custom printing** may be more suited for your needs. Whether you're printing **several individual pages** or a **range of pages**, Word allows you to **specify** exactly which pages you'd like to print.

To custom print a document:

If you'd like to print individual pages or page ranges, you'll need to separate each entry with a **comma** (1, 3, 5-7, or 10-14 for example).

- 1. Navigate to the **Print** pane.
- 2. In the **Pages:** field, enter the pages you want to print.

3. Click **Print**.

Headers and Footers

To create a header or footer:

In our example, we want to display the author's name at the top of each page, so we'll place it in the header.

1. Double-click anywhere on the **top or bottom margin** of your document. In our example, we'll double-click the top margin.

5. The header or footer text will appear.

To insert a preset header or footer:

Word has a variety of **preset headers and footers** you can use to enhance your document's design and layout. In our example, we'll add a preset header to our document.

1. Select the **Insert** tab, then click the **Header** or **Footer** command. In our example, we'll click the **Header** command.

Editing headers and footers

After you close the header or footer, it will still be visible, but it will be **locked**. Simply double-click a header or footer to **unlock** it, which will allow you to edit it.

To add page numbers:

Word can automatically label each page with a page number and place it in a header, footer, or side margin. If you have an existing header or footer, it will be removed and replaced with the page number.

1. On the **Insert** tab, click the **Page Number** command.

2. Open the **Top of Page**, **Bottom of Page**, or **Page Margins** menu, depending on where you want the page number to be positioned, then select the desired style of header.

3. Page numbering will appear.

4. Press the **Esc** key to lock the header and footer.

Page 1 <u>Andrew Lytle at The Sewanee Review</u> Countain at the University of the South in Sewanee, Tennessee, is the view. Founded in 1892, the Sewanee Review (SR) has never missed an he oldest continuously published quarterly review in the United States.

5. If you need to make any changes to your page numbers, simply double-click the header or footer to unlock it.

If you've created a page number in the **side margin**, it's still considered part of the **header** or **footer**. You won't be able to select the page number unless the header or footer is selected.

To add page numbers to an existing header or footer:

If you already have a header or footer and you want to add a page number to it, Word has an option to automatically insert the page number into the existing header or footer. In our example, we'll add page numbering to our document's header.

1. Double-click anywhere on the **header** or **footer** to **unlock** it.

2. On the **Design** tab, click the **Page Number** command. In the menu that appears, hover the mouse over **Current Position** and select the desired **page numbering style**.

Andrew Lytle at The Sewanee Review

Atop Monteagle Mountain at the University of the South in Sewanee, Tennessee, is the

office of The Sewanee Review. Founded in 1892, the Sewanee Review (SR) has never missed an

issue, distinguishing it as the oldest continuously published quarterly review in the United States.

4. When you're finished, press the **Esc** key.

Andrew Lytle at The Sewanee Review December 21, 2015

Atop Monteagle Mountain at the University of the South in Sewanee, Tennessee, is the

office of The Sewanee Review. Founded in 1892, the Sewanee Review (SR) has never missed an

Andrew Lytle at The Sewanee Review

issue, distinguishing it as the oldest continuously published quarterly review in the United States.

To hide the page number on the first page:

In some documents, you may not want the first page to show the page number. You can **hide the first page number** without affecting the rest of the pages.

- 1. Double-click the header or footer to unlock it.
- 2. From the Design tab, place a checkmark next to **Different First Page**. The header and footer will disappear from the first page. If you want, you can type something new in the header or footer, and it will only affect the first page.

If you're unable to select **Different First Page**, it may be because an object within the header or footer is selected. Click an empty area within the header or footer to make sure nothing is selected.

To restart page numbering:

Word allows you to restart page numbering on any page of your document. You can do this by inserting a section break and selecting the number you want to restart the numbering with. In our example, we'll restart the page numbering for our document's **Works Cited** section.

1. Place the **insertion point** at the **top of the page** you want to restart page numbering for. If there is text on the page, place the insertion point at the **beginning of the text**.
