Q1/
What is the use of Theodolite Instrument?

Al-Mustansiriyah University	Laboratory of Surveying	Assist. Lect. Wael Shahatha
Environmental Department	Second Stage	2017

Q3/
Calculate the horizontal distance EC?

Given;

- 1- Azimuth BE=120°
- 2- Azimuth BA=140°
- 3- Distance BA=5.5m.
- 4- Distance BC=6m.
- 5- Distance BE=5m.

Q4/
Convert 30 degree to Radian measure?

Al-Mustansiriyah University	Laboratory of Surveying	Assist. Lect. Wael Shahatha
Environmental Department	Second Stage	2017

Q5/

Find The elevation at point E, which is the top of a half circle window?

Given:

- 1- The elevation at point B=1 m.
- 2- The elevation at point C=3.86 m.
- 3- The elevation at point D=5.53 m.
- 4- The Radius= 5 m.
- 5- Angle CAB=35°
- 6- Angle DAC=30°
- 7- Angle EAD=25°

Q6/

Given the scale 1/500, if the distance at site =127 m, what is the distance at paper in inches?

Al-Mustansiriyah University	Laboratory of Surveying	Assist. Lect. Wael Shahatha
Environmental Department	Second Stage	2017

Q7/

Calculate the vertical distance H which is the height of the flag.

Given:

- 1- The reduced level at points (A, B, and C) is (32.831, 31.452, and 30.937 m) respectively.
- 2- The height of the Theodolite instrument at points A and B is (1.78m, and 1.45m) respectively.
- 3- The vertical angles between the horizon and the flag for points A and B are (30° and 45°) respectively.

NOTE: The drawing is not to scale.

Answer: When the value of a distance $x=5m$, then the value of $H=12.828m$. Use this value for checking your solution steps.
