

شعبة (A) واجب برامج Function

البرنامج	اسم الطالب	ت
Design a function to calculate the squared value of an integer passed from the main function. Use this function in a program to calculate the squares of integers from 1 – 10.	احمد حسين راشد حمود	1
Write program to return the maximum of two values.	احمد عبدالله جواد	2
Write program define 3 functions first to read arrays X(8) Y(9), second to sort X and Y in ascending order , third to print X and Y.	اسماء هلال حسين عثمان	3
Write program to read the values of four variables then defines functions to calculate: the airmean (arithmetic mean) from the following equation : $airmean = (z1+z2+z3+z4) / 4$	امجد يامر محمد مهين	4
Write program define functions to each of the following: a-Read a list of integer number. b- Test each number if prime or not.	ايمان نوري كاظم لفته	5
Write program to compute Fibonacci number (integer sequence) 1,1,2,3,5,8,13,21,34,55,89	ايه ماجد جمعه سعيد	6
Write program define a function to find value of current (I) for value of voltage $V=24$ volt and resistance $R=3$ ohm.	آيه فاضل عباس ابراهيم	7
Write program defines a function to find the sum of digits in a number.	بشائر عدنان نايف	8
Write program with functions for each of the following : 1 st fun:read array with 8 number. 2 nd fun.:find the average of numbers	بشرى سلمان علي وكاع	9
Write program defines a function to read a date and find the next date.	بلال مسلم مقتن	10

Write program define 3 functions to read and print two arrays of size (15), and third function to merge in new array.	بيداء عبيد خضير سلوم	11
Write program with functions for each of the following : 1 st fun:read array with 10 number. 2 nd fun.: count the odd & even number in an array. 3 rd fun: print an array and all results.	تبارك طارق عبد الكاظم فرحان	12
Write program to find circumference and area of a circle with radius (2.5).	تحسين علاء زغير وهيب	13
Write a function to find the largest integer among three integers entered by the user in the main function.	تقى احمد جواد	14
Write program define functions to each one of the following : a- read array of size(5*5) b-sum of elements in each row	جنان جاسم نعمه جلعف	15
Write a program in c++ language define a function to compute cirumference of square if length greater than 50.	حامد ابراهيم احمد دبيج	16
Write a program that enters two different numbers and prints an error if the two numbers are not different and then print the largest number.	حسين عباس خضير عباس	17
Write program define a function to find the sum of digits in a number.	حسين عباس فرحان كريم	18
Write program to read a list of size (10), then define a function shift list to left two locations.	حسين عبد الله كاظم مشكور	19
Write program define three functions to compute volume of cube, volume of rectangle, and volume of cylinder.	حسين علي هادي دعيوش	20
Write program define functions to : A-Read a list of size (10). B- Split above list in to two sub list at the same of size.	حسين ماجد ياسين راضي	21
