Abstract

Al-sarakhst is regarded as one of the most important figures in the heritage of Islamic traditions.

This study is aiming at studying his efforts in the semantic and linguistic field .

The thesis consists of an introduction and three chapters .The introduction is designed to produce a general outlook of linguistic research importance in the science of Islamic Jurisprudence foundations .

The first chapter is devoted to study the inventional (coining)significance by investigating some issues like ,concept of words coining by al.Sarkhasi ,meaning and classification of words in to specialized ,generalized ,polysemy and interpreted .

The second chapter deals with identical significance and figurative significance through the following issues : reality ,types of reality ,figurative expression ,between reality and figurative expression , metaphor ,metonymy and finally between metonymy and figurative expression .

The third chapter is dedicated to study the contextual significance , according to the following classification :

- context in the studies of traditionalists and commentators .
- context and significance of imperative mode (context and word significance)
- context and significance between real expression and figurative expression .
- context and significance as obvious and ambiguous .

The thesis has come up to a conclusion summarizing the final academic results .
