The Manufacturing Industries Fact Under The Economic Reforms in selected Arabic Countries

Abstract

The economists agree on the importance of the manufacturing industry that undertake in the economical development operation through frontward and backward connections for different national economical sectors.

When the developing countries forced to the programs of the world Bank and IMF. The application of these programs produced an international social and economical influence effected on the macro economics variables, also it effects on the production sectors included the manufacturing industry.

The research started from the assumption of that the programs of the economic reform which are approved by Egypt and Jordan have effects in the social and economical sides on the manufacturing industry.

The research aims to:

- Specifying the economical effects resulted from applying the economical reforming programs on the transforming industry in each of Egypt and Jordan.
- Specifying the social influences resulted from applying the above programs.

- Trying of elevated receiving the manufacturing industry in each of Egypt and Jordan.

In order to accomplish these aims, the thesis is divided into five chapters, the research reached to many conclusions and recommendation stated in conclusion.
