Abstract

Analysis of the effects of customs policy in the Iraqi economy for the period (1995–2010)

customs Policy includes laws, systems and procedures followed by the countries to regulate the entry and exit of goods to and from the country for achievement a number of aims, But the direction of economic policy in Iraq towards the transition from trade protectionism to free trade policy in unexpected after the year 2003, reflected on the stoped of the customs tariff law No. 77 of the year 1955 and replaced reconstruction duties (5%), Which led to back of its importance as a source of income as Income from decreased customs in the total public revenue in the Iraqi economy from an average of (10.8%) for the period 1995–2002, To an average of (0.39%) for the period 2003–2010, in addition to its importance in the protection of the local production and back of customs wall rate, And ineffective in coping with economic changes based on the results of the indicators used, which indicates the limitations of the system customs in Iraq and its inability to respond to economic changes. Therefore, So the study tried

to declaration the roles that can be played by the customs tariff to variety of the Iraqi economy, according to its advantage to faces the problem of the clearing another types of incomes.
